Allowance of Application # 10/820,566

1. The following communication is in response to applicant's amendment received 21-September-2005. Claims 5, 7, 10 and 21 have been cancelled by this amendment.

Reasons for Allowance

2. The following is an Examiner's Statement of Reasons for the indication of allowable subject matter. The instant application is directed to a non-obvious improvement over the invention described in U.S. Patent No. 6,315,569 to Zaltman. The improvement comprises a method of developing architectural design objectives for use in design of a building, wherein in performing an architectural design project, a metaphor elicitation technique is performed and the results analyzed in order to extract relevant dimensions and activating cues, wherein the relevant dimensions and activating cues are prioritized and used to develop the architectural design objectives. This patentable distinction is included in each of the independent claims, nos. 1, 15, and 20. The art of record, either individually or in combination, fails to teach, suggest, or render obvious the useful, concrete and tangible <development of architectural design objectives for use in design of a building by incorporating the use of metaphor elicitation techniques> having the corresponding structure which is disclosed in the specification and equivalents thereof at least at page 6, line 15 through page 20, line 28, and Figures 1-3. In view of the foregoing, the claims of the present application are found to be patentable over the prior art.
